Life Is Continuous.

To the Editor: Your correspondent, George Smith, of Nyack, N. Y., in this evening's "World" asks "What is and life are governed by a universal law, and that there must be a universal law of birth, of life, of death, of resurrection, of salvation, and or a centinued state of existence, that man has a sateral body and also a spirtual body, and that the spirit is the energy force and intelligence that pervades and animates the natural body-in fact, is the real body, imperishable and eternal; that when the change called death occurs, and the epirit leaves the body and is encompassed by the seul. It becomes a celestial body, the soul being the form and perceptible to clairvoyant vision, the spirit being a universal principle ating in harmony with subtle magnetic forces that preserve the identity of each individual life. Science is clearing away the mystery, doubt and misery that a false theology has failed to do, and your correspondent may, in investigating this matter in a scientific manner, discover the ment, total depravity, eternal punishment, &c. have no standing in a scientific examination of this important subject, that life is continuous, is as clear of demonstration as any problem in mathematics. I know of no reason why the intelli-gence possessed by a splendid horse or a noble dog should ever be destroyed.

New York, Oct. 5. GEORGE 8. BOWEN, Low Wages for New York Girls.

We the Editor: I would be pleased if you would publish the prices paid in New York City for making the same articles as those spoken of in your little article. "Factory Girls in France." Put them in the "deadly parallel" column and I think you will find our girls live on as little money as do those of Paris, allowing for the higher rate of living expenses here. I know of a "learner" in a dressmaking establishment who received \$1 per wock for three years, and am acquainted with a widow, a skilful needle woman, who was able to earn at making infants' dresses, working fourteen hours a day, the gen-erous sum of 24 cents.
